LIST OF CONTENTS FOR VOLUME 27, 2000

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2000 Volume 27, Number 1 January

Contents

A.H. Beitelmal, M.A. Saad and C.D. Patel	1	Effects of surface roughness on the average heat transfer of an impinging air jet
X. Gao and B. Sunden	13	Detailed measurements of heat transfer coefficients in a rectangular duct using hue-based calibrated liquid crystal
V.D. Stevanovic and Z.Lj. Jovanovic	23	A hybrid method for the numerical prediction of enthalpy transport in fluid flow
S. Wongwises, S. Disawas, J. Kaewon and C. Onurai	35	Two-phase evaporative heat transfer coefficients of refrigerant HFC-134a under forced flow conditions in a small horizontal tube
L.C. Thomas	49	A thermal circuit method for heat transfer in composite walls with energy generating sections
E.N. Macedo, C.E. Maneschy and J.N.N. Quaresma	59	Analysis of the mass transfer entry region for drag-reducing viscoelastic fluids in turbulent pipe flow
R. Bennacer, H. Beji, R. Duval and P. Vasseur	69	The Brinkman model for thermosolutal convection in a vertical annular porous layer
X.Y. You and X. Xiao	81	Gaster transformation with the effects of heat transfer
E. Alvarez, J.M. Correa, C. Riverol and J.M. Navaza	93	Model based in neural networks for the prediction of the mass transfer coefficients in bubble columns. Study in Newtonian and non-Newtonian fluids
M.N. Coelho Pinheiro	99	Liquid phase mass transfer coefficients for bubbles growing in a pressure field: A simplified analysis
F.T. Poujol, J. Rojas and E. Ramos	109	Natural convection of a high Prandtl number fluid in a cavity
W.-S. Fu and W.-W. Ke	119	Effects of a random porosity model on double diffusive natural convection in a porous medium enclosure
R. Yang, S.F. Chang and W. Wu	133	Flow and heat transfer in a curved pipe with periodically varying curvature
Announcement	145	The 12th International Symposium on Transport Phenomena (ISTP-12)
Announcement	146	International Symposium on Heat Transfer in Gas Turbine Systems - Turbine-2000
Announcement	147	2nd ICHMT Symposium on Advances in Computational Heat Transfer
Announcement	148	Call for Nominations - The Nusselt-Reynolds Prize

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2000 Volume 27, Number 2 February

Contents

C.D. Ho and O.C. Sandall	149	The effect of recycle on laminar countercurrent heat exchangers with insulation sheet inserted for double-pass operation
C.-H. Sohn, S.-T. Ahn and S. Shin	159	Heat transfer behavior of temperature-dependent viscoelastic non-Newtonian fluid with buoyancy effect in 2:1 rectangular duct
J. Wojtkowiak and C.O. Popiel	169	Effect of cooling on pressure losses in U-type wavy pipe flow
W.W. Lin and D.J. Lee	179	Second-law analysis on a flat plate-fin array under crossflow
L.P. Chua, S.C.M. Yu and H.-S. Li	191	Flow visualization and preliminary measurements of a confined jet with and without target
F.S. Costa	201	Effects of exothermicity on unsteady diffusion flames
M.H.J. Pedras and M.J.S. de Lemos	211	On the definition of turbulent kinetic energy for flow in porous media
Z.W. Liu and D.J. Lee	221	Boiling of biological sludges
J.G. Maveety and H.H. Jung	229	Design of an optimal pin-fin heat sink with air impingement cooling
M. Duranay, M. Inalli and K. Pihtili	241	Finite element analysis for cooling of a vertical composite plate
I.H. Tavman and H. Akinci	253	Transverse thermal conductivity of fiber reinforced polymer composites
A. Avci and I. Karagoz	263	A mathematical model for the determination of a cyclone performance
R. Keanini, S. Phan, S. Smith and R. Hocken	273	Resonance based pressure measurement and anemometry for high temperature flows: design principles and preliminary results
S.H. Kim, I.-C. Bang, W.-P. Baek, S.H. Chang and S.K. Moon	285	CHF detection using spationtemporal neural network and wavelet transform

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2000 Volume 27, Number 3 April

Contents

Z.Q. Chen, P. Cheng and T.S. Zhao	293	An experimental study of two phase flow and boiling heat transfer in bi-dispersed porous channels
M.M. Rahman	303	Analysis of simultaneous gas absorption and chemical reaction to a thin liquid film over a spinning disk
C. Mackie	315	Thermal convection in a sparcely packed porous layer saturated with suspended particles
L. Sridhar and K.A. Narh	325	The effect of temperature dependent thermal properties on process parameter prediction in injection molding
A. Mahidjiba, L. Robillard, P. Vasseur and M. Mamou	333	Onset of convection in an anisotropic porous layer of finite lateral extent
S. Wongwises, P. Chan, N. Luesuwanatat and T. Purattanarak	343	Two-phase separated flow model of refrigerants flowing through capillary tubes
C.R. Regis, R.M. Cotta and J. Su	357	Improved lumped analysis of transient heat conduction in a nuclear fuel rod
H. Asan	367	Natural convection in an annulus between two isothermal concentric square ducts
J. Wang	377	Preliminary analysis of rapid boiling heat transfer
B. Ozerdem	389	Measurement of convective heat transfer coefficient for a horizontal cylinder rotating in quiescent air
H. Umur	397	Flow and heat transfer with pressure gradients, Reynolds number and surface curvature
L. Malinowski	407	Analytical solution to the equations for parallel-flow four-channel heat exchangers
D.A.S. Rees and I. Pop	415	The effect of g-jitter on vertical free convection boundary-layer flow in porous media
J.A. Copati and R. Krishna	425	Influence of non-condensables on the condensation of vapour mixtures forming immiscible liquids
M.M. Zaki, I. Nirdosh and G.H. Sedahmed	435	Natural convection mass transfer behaviour of long vertical annuli

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2000 Volume 27, Number 4 May

Contents

D.A. Johnson	443	Experimental and numerical examination of confined laminar opposed jets, Part I. Momentum imbalance
D.A. Johnson	455	Experimental and numerical examination of confined laminar opposed jets, Part II. Momentum balancing
R. Krishna, A.J. Dreher and M.I. Urseanu	465	Influence of alcohol addition on gas hold-up in bubble columns: development of a scale up model
B. Ladevie, O. Fudym and J.C. Batsale	473	A new simple device to estimate thermophysical properties of insulating materials
R.Y. Jumah and A.S. Mujumdar	485	Free convection heat and mass transfer of non-Newtonian power law fluids with yield stress from a vertical flat plate in saturated porous media
M.M. Rahman	495	Measurements of heat transfer in microchannel heat sinks
L.P. Chua, H.-S. Li and H. Zhang	507	Calibration of hot wire for low speed measurements
L.P. Chua, S.C.M. Yu and W.P. Tam	517	PIV measurements of proximal models with different anastomotic angles
M.E.C. Oliveira and A.S. Franca	527	Finite element analysis of microwave heating of solid products
C.-Y. Cheng	537	An integral approach for heat and mass transfer by natural convection from truncated cones in porous media with variable wall temperature and concentration
M. Al-Busoul and M. Abu-Zaid	549	Prediction of heat transfer coefficient between immersed surfaces and fluidized beds
Y. Sezen	559	Unsteady mass transfer analysis of evaporation of a single multicomponent droplet with diffusion and constant rate processes
A. Daloglu and A. Unal	569	Heat transfer from a cylinder in the wake flow
M.A. El-Hakiem	581	Viscous dissipation effects on MHD free convection flow over a nonisothermal surface in a micropolar fluid
K.A. Yih	591	Viscous and Joule heating effects on non-Darcy MHD natural convection flow over a permeable sphere in porous media with internal heat generation

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2000 Volume 27, Number 5 July

Contents

Z.Q. Chen, P. Cheng and C.T. Hsu	601	A theoretical and experimental study on stagnant thermal conductivity of bi-dispersed porous media
S. Wongwises, T. Songnetichaovalit, N. Lokathada, P. Kritsadathikarn, M. Suchatawat and W. Pirompak	611	A comparison of the flow characteristics of refrigerants flowing through adiabatic capillary tubes
S. Syrjala	623	A new approach for the simulation of melting in extruders
L.H. Liu	635	Simultaneous identification of temperature profile and absorption coefficient in one-dimensional semitransparent medium by inverse radiation analysis
C.-H. Cheng and J.-H. Yu	645	Buoyancy-assisted flow reversal in vertical circular channels within an asymmetrically-heated slab
T.-C. Wu, Y.-M. Yang and J.-R. Maa	655	Surfactant-induced retardation of the thermocapillary flow at a gas/liquid interface
F. Gori and L. Bossi	667	On the cooling effect of an air jet along the surface of a cylinder
S.W. Ahn	677	Prediction of turbulent heat transfer in concentric annuli with outer rough wall
Z. Lipnicki	689	Dynamical solidification of metal filling a cooled cylindrical channel
C.-Y. Chen, L.-H. Chen and Y.-L. Lee	705	Nucleation and growth of clusters on heterogeneous surfaces
Y.-T. Lin, T.-J. Yeh and H.-S. Wu	719	Experimental study of convective heat transfer from the surface of a gyratory lantern
A. Postelnicu, T. Grosan and I. Pop	729	Free convection boundary layer over a vertical permeable flat plate in a porous medium with internal heat generation
A. Raptis	739	Local similarity transformations for the boundary layer flow through a homogeneous porous medium by the presence of heat transfer

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2000 Volume 27, Number 6 August

Contents

M. Boland, P. Arce and E. Erdmann	745	Free convection flows in fibrous or porous media: A solution for the case of homogeneous heat sources
F. Joly, P. Vasseur and G. Labrosse	755	Soret-driven thermosolutal convection in a vertical enclosure
A. Mahidjiba, L. Robillard and P. Vasseur	765	Onset of convection in a horizontal anisotropic porous layer saturated with water near 4°C
N. Banu and D.A.S. Rees	775	The effect of inertia on vertical free convection boundary layer flow from a heated surface in porous media with suction
C.D. Ho, H.M. Yeh, W.P. Wang and J.K. Wang	785	Cool thermal discharge obtained with air flowing over melting ice by complete removal of melt
G.Y. Han	795	A mathematical model for the thermal-hydraulic analysis of nuclear power plants
B.D. Shaw and M.L. Pantoya	807	Growth and application of large spherical bubbles using reactive gases
M. Abu-Zaid	815	A fouling evaluation system for industrial heat transfer equipment subject to fouling
F.D. Rocamora Jr. and M.J.S. de Lemos	825	Analysis of convective heat transfer for turbulent flow in saturated porous media
S.S. Okoya	835	Temperature distributions for a semilinear reaction - diffusion equation
B. Peng and L. Jianxin	845	Humidification of air with warm water at elevated pressure in wetted-wall column
S.M. Sami and D.E. Desjardins	855	Heat transfer of ternary mixtures inside enhanced surface tubing
S. Kiwan, M. Al-Nimr and M. Al-Sharo'a	865	Trial solution methods to solve the hyperbolic heat conduction equation
C.V. Madhusudana	877	Accuracy in thermal contact conductance experiments - the effect of heat losses to the surroundings

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2000 Volume 27, Number 7 October

Contents

R. Krishna	893	Diffusion of binary mixtures in microporous materials: overshoot and roll-up phenomena
S. Kharche and J.A. Howarth	903	The inward solidification of a liquid cylinder with periodic axial perturbation of the boundary temperature or heat flux
S. Kharche and J.A. Howarth	913	The inward solidification of a liquid cylinder with periodic axial perturbation of the boundary geometry, and constant boundary temperature or heat flux
J.F. Nastaj	925	Numerical model of vacuum drying of suspensions on continuous drum dryer at two-region conductive-convective heating
L. Malinowski	937	Analytical solution to the equations for parallel-flow four-channel heat exchangers. Part 2: Double zero eigenvalue case
J. Su, A.B. Lopes and A.J. Silva Neto	945	Estimation of unknown wall heat flux in turbulent circular pipe flow
R.M. Saldanha da Gama	955	An upper bound estimate for a class of conduction heat transfer problems with nonlinear boundary conditions
M.C.L. Reis, E.N. Macedo and J.N.N. Quaresma	965	Improved lumped-differential formulations in hyperbolic heat conduction
R.N. Pandey, S.K. Pandey and J.W. Ribeiro	975	Complete and satisfactory solutions of Luikov equations of heat and moisture transport in a spherical capillary-porous body
T.C. Jue	985	Analysis of oscillatory flow with thermal convection in a rectangular cavity filled with porous medium
K.-T. Lee	995	Fully developed laminar natural convection heat and mass transfer in partially heated vertical pipe
S. Kim, B. Lee and S. Cho	1003	A front-layer predictor-corrector algorithm with pseudo Newton-Rapson method for the phase change heat conduction problems
M. Eissa Sayed-Ahmed	1013	Laminar heat transfer for thermally developing flow of a Herschel-Bulkley fluid in a square duct
A.A. Mohammadein and M.F. El-Amin	1025	Thermal radiation effects on power-law fluids over a horizontal plate embedded in a porous medium
M.A. Seddeek	1037	The effect of variable viscosity on hydromagnetic flow and heat transfer past a continuously moving porous boundary with radiation

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

2000 Volume 27, Number 8 November

Contents

S.M. Sami and D.E. Desjardins	1047	Boiling characteristics of ternary mixtures inside enhanced surface tubing
L. Royon, G. Guiffant and P. Perrot	1057	Forced convection heat transfer in a slurry of phase change material in an agitated tank
J.F. Branco, C.T. Pinho and R.A. Figueiredo	1067	Heat conduction in the hollow sphere with a power-law variation of the external heat transfer coefficient
G. Cammarata, A. Fichera and A. Pagano	1077	Nonlinear analysis of a rectangular natural circulation loop
S.D. Harris, D.B. Ingham and I. Pop	1091	Transient free convection near the lower stagnation point of a cylindrical surface subjected to a sudden change in surface temperature
J. Monzo-Cabrera, A. Diaz-Morcillo, J.M. Catala-Civera and E. de los Reyes	1101	Heat flux and heat generation characterisation in a wet-laminar body in microwave-assisted drying: An application to microwave drying of leather
L.P. Chua, K.S. Ong and S.C.M. Yu	1111	Preliminary measurements of gap velocity of a blood pump model
L.P. Chua, Y.F. Li and S.C.M. Yu	1121	Self-preservation of a heated square jet
Y.Y. Bae, H.-Y. Kim and J.-K. Park	1131	Analysis on flow transients in a pipe with sparger and load reduction ring
C.-Y. Cheng	1143	Natural convection heat and mass transfer near a vertical wavy surface with constant wall temperature and concentration in a porous medium
S. Chantasiriwan	1155	Inverse determination of steady-state heat transfer coefficient
B. Xu, K.T. Ooi, N.T. Wong and W.K. Choi	1165	Experimental investigation of flow friction for liquid flow in microchannels
M.E. Sayed-Ahmed and H.A. Attia	1177	MHD flow and heat transfer in a rectangular duct with temperature dependent viscosity and Hall effect
	1189	LIST OF CONTENTS FOR VOLUME 27, 2000
	1197	AUTHOR INDEX TO VOLUME 27, 2000
